## Look Ahead And Prepare

Conditions in Western Canada, considering the whole area of the prairie provinces, present a changed picture this year to that of several years past, and the change is almost entirely due to the weatherman. With the exception of comparatively small tracts, the great grain producing area of southern Saskatchewan which in recent years has suffered a lack of moisture has been favored with copious falls of rain, and Nature has thus largely solved a problem which all Governments and individuals, despite the expenditure of tens of millions of dollars, could barely cope with and certainly could not solve.

At the time of writing—which is ten days or so before this will appear in print—prospects are not only favorable for a normal, possibly an above normal, crop, but the lack of frost and frost for livestock seems solved as the soil is again saturated with moisture, sloughs and creeks filled with water, and grass again covers the ground. It is too early yet to assume that, perhaps at the end of the season, the weatherman will be right and it would be a mistake to take too much for granted in a country where conditions change so quickly. At the moment, however, prospects are bright, and the foundation laid by May and June rains is such as to make a decided improvement almost a certainty.

Confidence in the country is being restored and hope is returning to many who had nearly abandoned hope and were on the verge of giving up to despair. Nature has thus provided an object lesson of how puny is man notwithstanding his really marvellous achievements, when it comes to what are, after all, the deciding factors in the prosperity of any people or country. Man may plan, and should plan within those spheres where the decision and the control rests in his own hands, but all his planning will fail if it is not in conformity with nature, and take into account what we erroneously term the vagaries of Nature.

With the experience of the past four or five years of drought, that drought, almost complete absence of rain, need for a new seed, a new sowing, and an abundance of reserves accumulated in good years to tide over the poor years which always come sooner or later, what is going to be the attitude of people in this and, it is to be hoped, even expected, future years? In these days where there is now an abundance of moisture, will the lessons of the past be remembered and steps proceeded with to conserve the surplus wherever possible and feasible? Or will people quickly forget and again live only in the present without taking thought for the future?

If Western Canada is blessed with a bountiful crop, plenty of hay and grasses, large quantities of wild fruits, vegetables, etc., will people, profit by the past, begin at once the building up of reserves against a future day when Nature may not be quite so generous in the bestowal of gifts? As Western people now look over their green and promising fields, are they planning, if the promise of those fields is fulfilled in the harvest, to conserve a little something as much as they possibly can, as an insurance for the future? Or will they quickly forget and dissipate their last resource, trusting to the future to again take care of itself?

It is no particular criticism of any person, or class of persons in this country to say that, in many respects, we have been a wasteful people, and have not practised that frugality which would have been the part of wisdom. Practically speaking, all of us have been more or less wasteful. We have employed our resources in satisfying the desires, the ambitions, the pleasures of the moment, without giving sufficient thought to the future. In above-normal prosperous years, instead of providing some reserve in a more or less liquid form to meet future needs, we have dissipated them, or locked them up in some concrete way, used them to expand our operations beyond what was necessary or wise. Thus seeming assets have been found to be heavy liabilities.

All have made mistakes—farmers, merchants, industrialists, financiers, municipalities, provinces, and the Dominion as a whole. Nobody can well point an accusing finger at any other person. But if we are wise, if we are capable of learning anything from past experience, surely we will now as a people, individually and collectively, recognize our past mistakes and not merely resolve not to repeat them, but proceed now to follow a different course, and, like Joseph of old, in the years of plenty put by to carry us and our country through years of scarcity.

Some people in the last year or two became almost convinced that drought and dust storms and crop failures had become a permanent condition. Those of riper experience knew better. They knew that the world has always experienced periods of plenty and periods of scarcity; that this is one of Nature's ways of maintaining an equilibrium, a safe balance. There is reason to hope that the recent period of drought and scarcity has passed, and that a more fruitful period is at hand. But other periods of drought and crop failures will surely come, now is the time to prepare for them, to ensure surely no person who has suffered through lack of the necessities of life in this recent period desires to pass through the same experience again.

Now is the time to take new heart, but it is also a time to think and act coolly, to keep one's feet on the ground, to prepare for the future and insure oneself to the fullest extent possible against whatever misfortunes or setbacks may be ahead.

The total shipments of certified Canadian exports of canned fruit, potato seed from Canada in 1934 to Great Britain were 28 per cent amounted to 1,328,748 bushels, 728 greater from January 1 to March 282 bushels being shipped during the 16, 1935, than during the corresponding months of January to May inclusive, in period of 1934. The principal increase and 600,163 bushels from the fall to increases were in canned apples, pears and peaches.

THE QUALITY CHEWING GUM

## Strange Discovery

### Huge Mound Of Black Substance Found In Northern Saskatchewan

A peculiar rock formation in the shape of a giant dome, which is considered to indicate the presence of either natural gas or oil, has been discovered in northern Saskatchewan, some 40 miles southwest of Lac La Poudre.

It consists of a huge mound of some black substance resembling low grade coal or tar, and, from the centre of which bubbles a salt spring.

Hon. T. C. Davis, K.C., attorney-general, who recently returned from an aeroplane trip over northern Saskatchewan to Lake Athabasca, brought some of the material back with him. He is making arrangements to have it analyzed.

Originally the discovery was made by the Indians who reported the huge mound of black substance.

Several theories respecting the presence of the mound have been advanced. One is that the salt spring bubbling from the earth has brought with it a flow of oil which over a period of years has built up the mound about the spring similar to deposit of geyserite.

The samples brought back by Mr. Davis are expected to be inflammable, although there is a fibrous substance permeating the sample which burns.

The giant mound from which the spring bubbles is located near Vermette Lake in the vicinity of Lac Plongé—Regional Leader.

## A Marvel At Languages

### Man At 81, Has Working Knowledge Of 50 Languages

A man after George Borrow's heart is George E. Hay, who, at the age of 81, has retired from the position of professor of the Oriental Languages, but who is still a fluent speaker of 50 languages. He was chiefly engaged in Oriental tongues and he corrected proofs in Sanskrit, Hindi, Persian, Pasjabi, Gujarati, Marathi, Urdu, Hindi, Bengali, Oriya, Tamil, Telugu, Kanarese, Malayalam, Sinhalese, Burmese, Siamese, Laos, Tibetan, Arabic, Coptic, Armenian, Ethiopic and Ancient Egyptian, also Chinese, Syrian, Greek and Hebrew.

The man who has acquired such education, so that all these accomplishments were acquired by evening classes and by reading in museums and the London Library, Oriental Languages. Primarily, he owed his success to a marvellous memory. Even now that he has retired his memory is still as good as when he was young. And there are millions of people who have little more than a working knowledge of one language.

## Matter Is Settled

### Science Dept. Estimates Superior Is World's Largest Lake

A year or so ago the News-Chronicle entered into a discussion of the relative sizes of Lake Superior and Lake Victoria Nyanya in Africa. Someone, including some school teachers, advising their pupils, had declared the African lake to be larger.

Using all the information it could obtain from atlases and encyclopaedias, this paper proved, to the satisfaction at least, that Superior was the larger and thus the largest lake in the world. This was definite if depth were considered, for it appears that large portion of Victoria Nyanya's surface is only a foot or so above the bottom and much of it filled with reeds and grasses.

We now find the following paragraph among the news items by a writer in the New York newspaper as something "interesting to know."

"It is estimated that Lake Superior exceeds in size its nearest rival, Africa's Lake Victoria Nyanya, by a thousand square miles."—Port Arthur News-Chronicle.

## To Catch Motor-Bandits

### Speed Ball To Tear Tires Is Latest Invention

A policeman of Bolton, England, has just invented a "motor-bandit catcher" which is expected to be the worst of criminals. It is in the form of a speed ball, which, when thrown in front of a speed car, bursts open into several apical arms covering a span of six feet and guaranteed to tear the toughest tires to shreds.

A Swedish geologist concludes that the South Island of Iceland had a warm, almost sub-tropical climate no longer ago than about 1000 B.C., after which the climate became much colder for reasons fully understood. 2104

## COULD NOT SEW A BUTTON ON

### Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But a blessing—in the form of Kruschen Salts—put her right again. "I was suffering from a terrible arthritis." "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands, I could not sleep at nights, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arms would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen Salts have the power of dissolving into the blood the ingredients of rheumatism. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channels."

"(Mrs.) J. H. Kruschen, who is responsible for the success of these salts, writes: 'I have kept on taking it, and now I sleep all night—thanks to Kruschen Salts have the power of dissolving into the blood the ingredients of rheumatism. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channels.'"

## Germans Challenge Record

### Bremen and Europa Will Make Attempts With Reserve Force

According to hints from German newspapers, the Normandie and the Lloyd liners Bremen and Europa will take up the battle for the "blue ribbon" of the Atlantic, which was won by the French liner Normandie.

Open expression of this determination was given by the Boeren Zeitung in a dispatch from Hamburg.

"It is not unlikely," the dispatch said, "that the Normandie, Bremen or Europa have still some horsepower in reserve with which they may give the Normandie a surprise."

The two German vessels have never used their top speed in their regular runs and have been holding back for just such competition as the Normandie or the Cunard-White Star Queen Mary is a story that always has been current in Germany, with just justification remains to be seen.

## Animals Like To Play

### Even Chubby Polar Bears Are Great Fun Makers

Almost any time in play time with monkeys. Give a monkey a musical instrument and he will play for hours.

Another monkey delight is to dress up and act like a human. One keeper at the London Zoo trained four young chimpanzees to well that they will take a meal at a table from tin plates and mugs, and pass everything round as politely as can be.

The Polar bears are also fun makers. The crew of a whaling ship once watched two bears playing on an ice floe. The main line of their game was to push and scramble about at the edge of the ice until one was pushed into the water.

Immediately the other bear would jump in beside him, and there would be another tussle until one was forced back to the ice. The winner would then assemble on the ice and the game would start over again.

## Town Seeing Double

### Contest In California Brought 500 Pair Of Twins

Five hundred pairs of twins answered the call when Long Beach, California, announced a twin contest. Youngest were Patricia Gale and Gale Patricia La Forte, 11 weeks. Oldest were H. E. and A. L. McArden, half and hearty at 85.

A twin judge jury available, Prince, cabin and shack in May has been taken up by the influx of miners. Large silver operators are tuning up the equipment preparatory to getting under way, while individual claim owners have started already to get out for summer shipment.

## Turkey Mothers Hawk

Ancient enemy of the farm yard, a batch of young hawks has been taken by a hen turkey at the home of D. Read, a Bushy district farmer. Read robbed several hawk nests and brought the eggs home, and set them under the turkey hen. Hatched, she mothered the young sky batters as her own.

Having a keyboard that can be extended over a bed, a piano that can be played by a person who is ill has been invented in England.

## MEC OINTMENT

THE FAMILY FRIEND

## Queen Likes Natural Folks

### Not Reserved If People Chat With Her Freely

In the Jubilee number of The Manchester Guardian a contributor writes about Queen Mary this way: "The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

"The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

"The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

"The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

"The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

"The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to do anything that is new to me.'"

## Charged With Writing

### Anti-Italian Articles

Italy Has Expelled Rome Correspondent Of Chicago Tribune

The Italian government press bureau has expelled David Darrah, the Rome correspondent of the Chicago Tribune. Darrah and his wife were forced to leave immediately. The reason for Darrah's expulsion was given as the writing of anti-Italian articles.

The bureau also issued an order banning until further notice the entrance of copies of the New York Times to Italy as a result of an editorial entitled "Haldwin and Mussolini."

The editorial appeared in the Times after recent speeches of Prime Minister Stanley Baldwin of Great Britain and Premier Benito Mussolini of Italy.

The action against the New York newspaper follows a similar one against a group of English newspapers, including the Manchester Guardian, and the lifting of a ban against German newspapers including the Nazi organ, the Volkischer Beobachter.

## Silver Boom In Yukon

### Miners Are Pouring In To Camp At Mayo

By air, land and water oldtimers and newcomers are hitting the trails back to the rich silver camp at Mayo, Yukon Territory, which is showing signs of returning to old-time activity on the crest of rising silver prices.

A twin judge jury available, Prince, cabin and shack in May has been taken up by the influx of miners. Large silver operators are tuning up the equipment preparatory to getting under way, while individual claim owners have started already to get out for summer shipment.

## New Air Conditioner

An air conditioner costing so little it is within the means of the average householder was described to the American Society of Heating and Ventilating Engineers in Toronto by Dr. H. Read, a Bushy district farmer. Read robbed several hawk nests and brought the eggs home, and set them under the turkey hen. Hatched, she mothered the young sky batters as her own.

The human scalp has approximately 1,000 hairs to the square inch, the average head containing 100,000 hairs. Women have a higher average than men, while red heads average only 90,000.

It is wonderful to have a friend, but it is still more wonderful to be a friend.

## What are the mild leaves saying?

"You've got to be good to get into Ogden's!" And it's only the mild leaves that are selected for Ogden's Fine Cut. So why shouldn't Ogden's be smoother and cooler? You simply can't beat Ogden's—it's got all you want in a cigarette tobacco.

Ogden's Fine Cut "Vogue" or "Chancellor" papers . . . any man who's tried the combination will tell you it's a guarantee of better and more satisfying cigarettes.

Spinning Device Determines Whether

Auto Wheels Need Adjusting

Eliminating hazardous road tests for "shimmy" and wobble, a dynamometer device subjects each wheel to a similar test without removing the car from the repair shop.

The machine consists of a spinner which mounts on the shaft of an electric motor and carries on a rubber-tired wheel. The speed of the motor is controlled from the end of a tabular handle like a vacuum cleaner.

The spinner wheel rocks from side to side for adjustment to the plane of the cam on the wheel so that the tire will not be damaged. The test is made with the wheel on the spindle, each wheel being jacked up and spun with the machine.

The motor quickly accelerates the wheel to eighty or 100 miles an hour. When the shimmy speed is reached the whole car shakes violently, indicating the wheel is out of balance and that it should be removed and trued up.—Popular Mechanics

## Choir Boys Liked Tour

Twelve Youngsters Return To London After Tour Of Canada

And U.S.

Soda-fountain chocolate milkshakes

and a deep impression will be one of 12 youngsters of the London choir school who returned to England from a concert tour in Canada and the United States.

The young choristers expounded their views on the United States and Canada, in epigrammatic fashion, with food the predominant note.

"Chocolate milkshake is a marvellous drink," one of them said. "I don't suppose I'll be able to get anything like it over here."

noon each week.

EDOUARD J. ROULEAU,  
Editor and Publisher

COMBINE TOWN AND  
SCHOOL SPOILS

The stampee sponsored by the busi-  
ness men of Carbon and community  
last Wednesday afternoon was proba-  
ly the best held in Carbon since the  
early days and the sponsors are to be  
congratulated on their splendid effort.

There is one drawback to the stam-  
pee alone, however, and this is that  
it was felt more than ever when the  
annual school sports and stampee days  
fell only two days apart. Both classes  
of entertainment are needed for a  
complete day of sport and in future  
we believe it would be more beneficial  
to combine the two days of sport into  
one big attraction. There would be  
plenty of time in the summer to run  
off the children's sports and the par-  
ade, leaving the stampee afternoon for  
the stampee events. In the evening  
ball games or other field sports could  
be played, giving the citizens of town  
and country a complete day of enter-  
tainment for their money.

If such a day of sport could be held  
another year we do believe that it  
would prove the best ever held here.  
What are the views of our local  
citizens on this question? There are  
many angles to be considered and  
the nucleus is the combination of all  
lines of sport into one big day.

CLAYPOOL DESERVES CREDIT  
FOR NEW HIGHWAY

Those of our citizens who have trav-  
elled over sections of the new high-  
way will have under construction between

Michener number 9 and 21, running  
through Carbon, have great praise for  
the work undertaken and when the  
road is gravelled one source of worry  
to the motorists of the immediate  
district will be alleviated.

While the road will be an asset to  
this district and municipality it must  
not be forgotten that it was obtained  
principally by the efforts of our gov-  
ernment member, Mr. A.B. Chynoweth,  
who has again been nominated to  
near the U.F.A. standard for Edouard  
continuity in the next provincial  
election. While the other roads (and  
important ones in the minds of a few)  
were given the only last fall, the  
road above mentioned was considered  
and approved by the minister of pub-  
lic works, principally through the ef-  
forts of Mr. Chynoweth, who gave his  
colleagues no peace until the wishes  
of his constituents were granted. The  
direct outcome was the application  
for the grading of this road being  
made and the work is now almost  
completed. Our only hope is that as  
soon as the grading has been finished  
that the Government of Public Works  
will see fit to gravel this road immed-  
iately.

## SCOWS USED TO CARRY AUTOS

EDMONTON—With autos carrying  
automobiles over flooded portions of  
the highway near Lesser Slave Lake,  
and railway scowders carrying mails,  
solution of the Peace River district  
was eased to some extent. North  
Alberta Railway passenger train  
was delayed at the Peace River  
Saturday afternoon with some home  
of getting through.

Latest reports from the flood area  
and stern conditions had subsided  
although the flood waters have not  
receded. Landslides have occurred on  
sections of the railway and at one  
place the roadbed is said to have de-  
cayed 15 feet.

COST OF PRODUCING WHEAT  
ON 17 ILLUSTRATION FARMS

Wheat cost \$1.14 a bushel to produce  
on 17 illustration farms in Manitoba  
and eastern Saskatchewan. The av-  
erage yield was 15.6 bushels per acre.

Complete records of the cost of pro-  
ducing wheat were kept by the Bureau of  
Agricultural Farming. Items charged in-  
cluded land rental, machinery, house  
and man labor, seed, twine, thresh-  
ing and other costs.

"You're driving me out of my mind!"  
"That's no drive, it's a nut!"

Teacher—"Some day travel here in  
taxis. Can any one give me an in-  
struction?"

Scholar—"Yes, sir, a mulefish. It  
travels round the globe every day."

GRAIN EXCHANGE MAKES OFFER  
TO AID PROBE INTO OPERATIONS

Reveals Exchange Suggested Months Ago That Appoint-  
ment of Pool Man as Government Supervisor  
Would be Welcomed.

In order to clarify its position in  
view of statements made at Ot-  
tawa, the Winnipeg Grain Ex-  
change has issued the following  
statement:

"On J. day afternoon the Prime  
Minister in a speech in the House  
of Commons reiterated the allega-  
tion originally made by Mr. John  
I. McFarland last October that  
foreign grain firms were engaged  
in a bear raid in the Winnipeg  
market. This allegation was inves-  
tigated by the Council of the Win-  
nipeg Grain Exchange and was  
fully answered in a statement is-  
sued and published in the press  
November 2, 1934, in the follow-  
ing terms:

"On October 1st Winnipeg  
newspapers carried an interview  
with Mr. John I. McFarland,  
who is in charge of the govern-  
ment's wheat operations, in  
which he stated that he would  
recommend to the government  
at Ottawa that an investigation  
be made into the selling of  
wheat on the Winnipeg market  
and would urge the government  
to make representations to the  
governments of Argentina and  
the United Kingdom that they  
take similar action in regard to  
the futures markets in Buenos  
Aires and Liverpool. About Oc-  
tober 8th a mischievous denun-  
ciation of Mr. McFarland's state-  
ment of an organized bear raid  
in the Winnipeg market was  
published during the two previous weeks  
appeared in many of the leading  
newspapers throughout Canada.

This denunciation originated  
apparently from some news-  
paper service in Winnipeg. It  
made free use of Mr. McFarland's  
name and its contents  
denied that figures and suggested  
facts given in it must have origi-  
nated from Mr. McFarland's  
organization. The article in its  
entirety and misquoting (there  
was no condition existing in the  
trading on the Winnipeg Grain  
Exchange that would justify  
such a story. It reads like a  
hoax, and to the best of our  
knowledge that is just what it  
is. There is no evidence in the  
figures showing the market pos-  
ition of grain firms as at Sep-  
tember 1934, and October 1st,  
secured by the Council of the  
Exchange from the Canadian  
House, and which have been dis-  
closed to Mr. McFarland, that  
any bear raid was attempted.  
Mr. McFarland has also been  
advised by the Council that in-  
ternational firms whose names  
have been mentioned in the  
connection were ready to au-  
thenticate the charges. How can  
the figures showing their  
trading available to him."

"The international investiga-  
tion suggested by Mr. McFarland  
and on October 1st simply in  
our opinion, not for the sake  
of. There can be no argument

about the fact that our greatest  
need is to export more Cana-  
dian wheat, and if there is any  
hope that an independent inter-  
national investigation into the  
situation in the Canadian grain  
and English markets will  
actions of government agencies  
or individuals that is making it  
difficult for us to market our  
wheat abroad, it should be en-  
deavored at once. It would ob-  
viously be in the interest of the  
whole country as well as of our  
wheat producers. It would, we  
are sure, be welcomed by the  
grain trade of Canada."

"The Council of the Ex-  
change would like to offer  
facilities for investigation of  
the trading operations of all its  
members, without exception, by  
competent and impartial per-  
sons. If such an investi-  
gation is deemed to be in the pub-  
lic interest, we are prepared to  
advise Mr. McFarland that the  
Exchange would, in addition,  
lend all possible assistance to a  
government supervisor of the  
kind recommended by the  
Stump Commission should the  
government see fit to appoint  
one."

"The action of the Winnipeg  
Grain Exchange in setting  
minimum prices for December and  
January wheat at 60c and 61c  
respectively was taken at the  
last meeting of the Canadian  
government and in pursuance  
of the policy the Exchange has  
long supported of co-operation  
with the Dominion govern-  
ment, and government wheat  
agency."

"In making the issuance of this  
statement, R. W. Miller, the Presi-  
dent, with the authority of the  
Council, advised Mr. J. McFarland  
that the Winnipeg Grain Ex-  
change would welcome the gov-  
ernment's investigation of the  
Exchange's operations, and that  
Mr. McFarland since December  
1934, and who previously to that  
was General Sales Manager of  
the Canadian Cooperative Wheat  
Producers' Association (the  
Canadian Wheat Pool), and  
the Council that it was prepared  
to afford facilities for investi-  
gation of the trading operations  
of all its members without excep-  
tion, and as to the appointment  
of a Grain Exchange supervisor, as  
suggested by the Stump Com-  
mission, has never been withdrawn.  
Representatives of the Winnipeg  
Grain Exchange now in Ottawa  
are prepared to furnish any in-  
formation which the committee  
may require."

"When does Shakespeare call the  
greatest chicken-killer in his plays?"  
"Macbeth—because he did murder  
most foul!"

"Why do they call it a dental par-  
lor?"

"Parlor is another name for draw-  
ing room."

"Judge, sentencing man to ten years:  
"Have you anything to say?"

"No, except it strikes me you are  
pretty liberal with other people's time."

She: "Did you learn right from  
wrong at your mother's knee?"

He: "No, because my father's."

"So your daughter can play the vin-  
lin now."

"No, she can't—but she does."

RESULTS OF TENNIS TOURNAY  
(continued from front page)

Malton, Carbon, 4-1, 6-0, Misses J.  
Heath and P. Hines, Hesketh, received  
a bye.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

Mixed Doubles

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

W. Paxon and Miss A. Hood defeated  
J. Phares and Miss P. Hines by default.

Semi-Finals—Misses D. and H. Col-  
born defeated Misses M. Ramsey and  
A. Lemay, 6-2, 6-1. Misses L. Lannon  
and M. Connolly defeated Misses J.  
Heath and P. Hines by default.

Final—Misses L. Lannon and M. Con-  
nolly, Drumheller, defeated Misses D.  
and H. Colborn, Three Hills, 6-4, 6-1,  
6-2.

You Must Keep on Buying  
Or You'll Soon Stop  
Selling

People are buying today—don't make any mis-  
take about it. If they are not buying from you, they  
are buying from somebody else—and when they buy  
they usually go where stocks offer best variety.

## U. S. TO WATCH THE EFFECTS OF LOWER TARIFFS

Washington.—The United States Government was said in official quarters to be aiming for economic war if international efforts at the world economic conference should fail to achieve lowered trade barriers.

At the same time, officials expressed some concern lest strong nationalist feelings in various parts of the world should lead to the prospects of success not only at London but in the arms reduction conference at Geneva.

Open pessimism as to the prospect of lowering tariffs and other trade barriers at the London conference being June 12, has been expressed by Assistant Secretary Raymond Moley of the state department, chief adviser of President Roosevelt and one of the leading architects of the domestic reconstruction programme.

Secretary Cordell Hull of the state department, a lifelong advocate of low tariffs, has taken a more optimistic view in general but has told newsmen it must be determined forthwith whether tariff moderation will be the objective or whether the goal will be finally abandoned and every nation turn back upon a policy of commercial isolation.

Other officials said definitely, though privately, that the United States is putting itself in a position to embark on a policy of comparative commercial independence of the rest of the world and to work on a self-contained national economy if efforts at international fail.

United States officials were described as having watched with some concern the progress of the United Kingdom in concluding special trade treaties with Argentina, Sweden, Norway, Germany and Denmark, in addition to the close commercial relations among the members of the British Empire, fostered by free trade agreements reached at last summer's economic conference at Ottawa.

## Limit Wheat Production

League Of Nations To Submit New Plan At London Conference

Geneva, Switzerland.—The council of the League of Nations was expected to submit a new plan for international action to deal with the wheat surplus.

The council received and adopted a report from the economic committee saying when delegates to the international wheat conference meet again in London they hope to reach an agreement on a world economic conference a plan providing:

1. For limitation of production and if necessary, of export of wheat.
  2. For liquidation of stocks.
  3. For maintenance of a reasonable export margin in European importing countries.
- "A substantial rise in the price of wheat," the report said, "would be a powerful remedy for the distress of agriculturists and would help materially in mitigating the general depression."

## Economic Council Advocated

Ottawa, Ont.—Establishment of an economic council in Canada, to comprise half a dozen men of outstanding ability, was advocated before the Canadian Political Science Association here. It should be a "thought organization," and one of its chief functions would be to advise governments on economic and social questions.

## Liquor Exports Halted

Ottawa, Ont.—Exportation of liquor to the United States even for medicinal purposes is prohibited under existing regulations, states the department of national revenue.

At present no beverage beyond 32 alcoholic content can be granted clearance to the republic, officials said.

## Patriot Boat Makes Seizure

Victoria, B.C.—Making her first seizure since her arrival here from the east coast, the Royal Canadian Mounted Police patrol boat "Adversus" picked up the Vancouver gas boat "Alden" Sunday with 155 cases of Canadian liquor on board.

## Believe France Will Default

Paris, France.—Belief that France will default on her debt payment due to the United States June 15 means to have approached certainty in quarters close to the government.

The amount of the French installment due for payment June 15 is \$40,738,000.

W. N. U. 1996

## Game Law Changes

Seek More Uniformity In Western Canada Regulations

Edmonton, Alta.—Important changes in the game laws of the prairie provinces are in prospect by the respective governments shortly. As a result of the conference in Edmonton between the Alberta, Saskatchewan and Manitoba game commissioners last week, recommendations will be made to their respective ministers with a likelihood of approval and early adoption.

Uniformity in the fur tax is one of the chief points involved in the prospective changes. The game commissioners are agreed that there should be the same rate for this tax in the three provinces and that there should also be full co-operation in its collection. New regulations under this provision will be issued early in July.

Agreement has also been reached for a uniform rate on wild and big game licenses. In the case of Alberta, it is understood, only slight changes will be involved.

General approval of a system of waded areas for trapping purposes was expressed by the game experts who agreed that a system would be in the interests of conservation. The question will be investigated during the year, with a view to gathering information leading up to possible legislation at the next sessions of the provinces.

## Big Housing Campaign

Move To Clean Up Slum Conditions In England

London, Eng.—The government is setting the opening shot of a gigantic housing campaign when the ministry of health launched a series of inquiries into slum conditions in England and Wales calling on them to co-operate in a five-year slum-clearance plan and in providing cheap-houses for working men.

The policy is one government circles believe will open a new era in housing. It marks a sharp departure from the government subsidy schemes which have been in operation for two decades. Except in limited cases the subsidies will be terminated and the field thrown open to the private builder.

Under the plan money will be provided largely by building societies. These societies, whose fund consist of the savings of small investors, now can lend only on first mortgages up to 70 per cent of the value of the mortgaged property. They will be empowered to lend up to 80 per cent of the value, and the government and local authorities together will guarantee the loans against any loss on the additional 20 per cent.

## World Traveller

Journalist Has Fringe For The West Coast Cruise Of Canada

Montreal, Que.—Near the end of a journey which has afforded him many adventures, John A. Chiff, journalist, formerly of Ottawa, now residing in London, is about to set sail for home after a trip around the world. Mr. Chiff has brought books of notes about Stromboli in partial eruption; about a weird midnight funeral procession of a low-caste Hindu in Bombay; painted natives fishing sharks in the waters of Fiji; and changing the emu in the wheat fields of Australia.

The cost of living had fallen considerably in Australia, New Zealand and the South Sea Islands and many people who formerly wintered in the south of France are crossing the equator and enjoying the winter weather of the antipodes, he added.

Of all the sights the traveller saw in his long journey, none was more striking or more impressive than that of the coast-line of Vancouver Island, British Columbia, and the State of Washington with snow-capped mountains in the background.

## University Is Sued

Calgary, Alta.—The court of appeal has reserved judgment in the \$30,000 Sirell estate case, in which seven residents of England are suing the University of Alberta. The plaintiffs claim they are rightful heirs to the estate, which was handed over to the university when authorities were unable to locate relatives of Henry Sirell after the latter had died intestate at Del Monte, Alta.

## Russian Plans To Attend

Moscow, Russia.—The Soviet government has formally announced its intention to participate in the London economic conference by making public the names of its delegates. Foreign Commissioner Gorkin Litsivsk, was expected, was appointed chairman of the delegation.

## Lord Wemyss Dies

Was Great Grandson Of King William IV.

Canter, France.—Admiral of the fleet, Lord Wemyss, great-grandson of King William IV, third cousin of King George, first and last baron of his name, who signed the armistice for Great Britain, died at his villa here at the age of 68.

Roslyn Erskine Wemyss, made a baron in 1919, joined the navy in 1877 and gained fame as commander of the squadron which landed troops in Gallipoli in April, 1915, only to withdraw them the following winter.

As chief of naval staff and chief naval adviser at the Paris Peace Conference of 1919 he won high praise for settlement of naval terms.

## Woman Lawyer

Newfoundland Judge Gives Welcome To Woman Practitioner

St. John's, Nfld.—Miss Louisa Saunders, the first woman lawyer to practice in Newfoundland courts, was welcomed by District Court Judge J. F. Morris, K.C., when she appeared on behalf of a client in a civil action.

In congratulating her on her success attained in her examinations and in wishing her an extensive practice Judge Morris said that under modern conditions it was not too much to hope that she would attain the "wood-sack," the chief justiceship.

## FRANCE BRINGS NEW PROBLEM TO WORLD COURT

Geneva.—France brought a new problem before the disarmament conference, when Foreign Minister Joseph Paul-Boncour opposed the destruction of heavy war material and advocated its preservation for use by the League of Nations against an aggressor.

Destruction of heavy war material is provided for in the British plan which is supported by the United States, Italy and Germany, as well as by its authors.

Thus the foreign minister of France revived and gave new emphasis to the old Tardieu scheme for the internationalization of heavy mobile guns, tanks and other offensive weapons.

A German spokesman, commenting afterwards, said that M. Paul-Boncour's announcement meant France no longer accepts the British project for which she has signed acceptance.

M. Paul-Boncour explained to the conference that the powers which are committed to give financial help to the country which is victim of an aggression would avoid waste by turning over war materials to the League instead of having them man-handled away or for the state attacked.

The French minister flatly announced that France would not reduce her armaments under a definite system of mutual assistance is created, supplemented by genuine supervision of armaments.

The supervision, he said, must especially cover armaments which are manufactured in private factories.

## UNITED STATES DELEGATES TO WORLD PARLEY

Winnipeg, Man.—The Manitoba Department of Agriculture opened its campaign against the grasshopper menace by shipping three tank-ways cars of poisoned bait into southern Manitoba. Hatching of eggs has been halted by rains but entomologists believe the time is ripe to strike the first blow.

"I am content," he said, "that the Prime Minister, turning to other considerations."

Although no reference was made to it in the House, parliamentary circles soon were busy with rumors concerning the king's birthday party. It was agreed nothing should be done in the way of a Canadian being tendered and accepting a title in June last from London or, unless parliament took some action in the meantime, the New Year day.

The whole question of titles will likely be introduced again in the House next session, but whether this will be before or after the New Year is uncertain.

Here are the three delegates selected by President Roosevelt to represent the United States at the World Economic Conference to be held in London this month. They will endeavour to formulate plans for pulling the world out of the morass of depression. At the left is Cordell Hull, Secretary of State; right is James M. Cox, of Ohio, who was elected minor party candidate for Presidency in 1920, and in the centre is Senator Key Pittman of Nevada.

## H.R.C. SCOUT

A lucky Canadian scout is King's

Scout Eric Laddell of Vancouver, who has been selected by the Hudson's Bay Company to go with its supply ship "Nasopie" into the Arctic this summer, to pay a fraternal visit to English and Scottish Rover Scout apprentices at H.B.C. posts.

Ramsay MacDonald Criticized

Viscount Snowden Makes Seathing Attack On Former Colonial Secretary

London, Eng.—Viscount Snowden, of Icknesham, made a seathing attack on Prime Minister Ramsay MacDonald, his former National Government cabinet colleague, in the House of Lords.

"I would suggest that the government should look into the case of the Prime Minister, not only in his own interests, but in the interest of the country," Lord Snowden said. "For it is a positive danger to the country that its affairs should be in the hands of a man who, every time he speaks, exposes his ignorance or incapacity."

The vicar, for years a colleague of Mr. MacDonald in the Labor Department, declared the Prime Minister might better have saved time and expense than to have gone to Washington for President Roosevelt's economic discussions.

"There were no results," Lord Snowden said, "except a repetition of the platitudes which we have heard scores of times in connection with the forthcoming conference."

The speech was made in the course of a debate on British policy at the world economic conference opening June 12.

Well-Known Sea Captain Vancouver, B.C.—Captain Gustave Folliott, 65, one of the best known sea captains and pilots on the British Columbia coast and Arctic waters, died in hospital here after a month's illness. Captain Folliott was in the service of the Hudson's Bay Company and commanded the famous Arctic ship "Lady Kimberley" when that vessel was abandoned in the Arctic ocean late in the summer of 1924.

Time To Fight Grasshoppers Winnipeg, Man.—The Manitoba Department of Agriculture opened its campaign against the grasshopper menace by shipping three tank-ways cars of poisoned bait into southern Manitoba. Hatching of eggs has been halted by rains but entomologists believe the time is ripe to strike the first blow.

## Preferred List

Many Prominent Men In List Of Customers Of J. P. Morgan and Company

Washington.—The names of men high in public and business life were put into the record of a senate committee in the presentation of a list of preferred customers of J. P. Morgan and Company.

Among them were William H. Woodin, now secretary of the United States treasury; William Gibbs McAdoo, Charles Francis Adams, Owen J. Roberts, John R. Nutt, John R. Raskob and Newton D. Baker. None of them was in public office, however, at the times they were recorded as having been sold stock by the Morgan Company at preferred prices.

As last after list of prominent men were put into the record, the imperious head of the company, J. P. Morgan, told the committee, under questioning, that he had paid income taxes in England for the years of 1931 and 1932. He previously had testified that because of financial losses, he did not pay taxes in the United States for those years.

The British laws, losses of capital generally cannot be deducted from income taxes returned in Great Britain. Such losses may be deducted under the United States laws.

## Oxford Group

Large Number Of "Changed" Canadians Gathering At Quebec City

Ottawa, Ont.—While members of the Oxford Group met, led by Dr. Frank D. Buchanan, are in Ottawa for the next few days, train from the far west of Vancouver are speeding eastward with special carloads of "changed" Canadians to attend the Oxford Group convention in Quebec City from May 26 to June 5.

Dr. Buchanan said that the experience of the team in North America since its arrival last fall has been truly remarkable.

## ACCEPTANCE OF TITLES IN CANADA IS OPEN QUESTION

Ottawa, Ont.—Premier R. B. Bennett declined to say there would be no titles granted to Canadians until parliament had considered the broad question of the acceptance of honors from the king. Titles could be granted by the king, Mr. Bennett said, without the consent or approval of parliament or ministers. It was the considered view of the government that titles should be granted to Canadians from accepting titles.

The short incident ended in a very pleasant manner the two party fight. "I do not wish," said Mr. King, "to deprive the Prime Minister of being made a life peer, if that is the wish of his majority, but I would ask him is that before a title of that kind is accepted by himself or anyone else, an opportunity be given this parliament to express its view with respect to titles in this country."

"I suppose I should say," replied the Prime Minister, "that if the Liberal Leader thinks he has added to the courtesy of debate, or established for himself any firm position in the regard and esteem of the people of the country by the observations he has just made in answer to an explanation with respect to the limitation of the prerogative of the crown, then I am content."

"I am content," he said, "that the Prime Minister, turning to other considerations."

Although no reference was made to it in the House, parliamentary circles soon were busy with rumors concerning the king's birthday party. It was agreed nothing should be done in the way of a Canadian being tendered and accepting a title in June last from London or, unless parliament took some action in the meantime, the New Year day.

The whole question of titles will likely be introduced again in the House next session, but whether this will be before or after the New Year is uncertain.

## NEW DRAFT OF SECURITY PACT TO BE SUBMITTED

Geneva, Switzerland.—Sir John Simon, British Secretary of State for Foreign Affairs, proposed a new draft for the security consultative pact before the disarmament conference.

Sir John told the conference his revisions were to conform with United States policy, particularly the American promise to refrain from any act weakening measures which the League of Nations may take against an aggressor.

This doctrine, the United States representative, Norman H. Davis, would be embodied in an unilateral declaration to be made shortly by the Washington Government.

The amended clauses of the British draft stipulate that in case of a security threat, a breach of the Briand-Kellogg pact, the league or any non-member may propose general consultation.

The object of this consultation would be:

1. To exchange views for the purpose of relieving peace and averting the conflict.
2. In the event of a breach, to give good offices for the restoration of peace.
3. If it is found impossible to restore peace, to determine which party is responsible for the dispute are to be held responsible.

If it is possible to identify the aggressor, Mr. Davis said, the United States would undertake to refrain from any action likely to defeat the concerted efforts of other nations to deal with the offending state.

United States, moreover, the American delegate announced, will not give protection to any member state who may engage in activities to defeat the international peace efforts.

The security commission of the League of Nations, as a nation which is the first to commit any of the following acts:

1. Declaration of war, invasion by armed forces of the territory of another state or refusal to deprive them of protection.
2. No political, military, economic or other considerations may excuse or justify aggression, according to the definition agreed upon by the security commission.

2. No political, military, economic or other considerations may excuse or justify aggression, according to the definition agreed upon by the security commission.

## Purchase Russian Railway

Japanese Approve Plan To Acquire Railway In Manchuria

Tokyo, Japan.—The cabinet has approved procedure proposed for the purchase from Soviet Russia of the Chinese Eastern Railway in Manchuria.

Three steps were suggested:

1. The state of Manchuria is to negotiate the purchase under Japan's guidance, fixing the amount and the terms of payment.
2. Because of doubts concerning Russia's clear title to ownership, Manchuria is to buy merely a transfer of the undoubted control of the railway by the Soviet.
3. Manchuria is to purchase various mining and timber concessions held by Russia in connection with the Chinese Eastern, thus eliminating Soviet influence in north Manchuria.

The negotiations are authoritatively expected to open shortly in Tokyo.

## Attempted Liquor Steal

Vancouver, B.C.—Breaking into a Canadian Pacific Railway freight car, thieves in Vancouver, B.C., threw off 65 cases of liquor. Railway officials stated that 56 cases had been picked up along the right-of-way of Mission Junction, about 50 miles east of Vancouver.

Another Trade Treaty London, Eng.—Great Britain has brought Ireland under her ring of new trade treaties. The treaty with Ireland is the sixth concluded within the past few weeks. Coal is in the other agreements, is the chief British export to secure advantage.

Personalographs

Born to Mr. and Mrs. F. McCracken, on Friday, June 30th, a son.

Nell Cunningham was accidentally injured on the morning of the stampede when he fell from his horse, sustaining a deep gash in his head.

The handicraft exhibit of the Dundas County L.O.P.E., held in the club room on Friday, and the P.O.E.'s Exchange hall Saturday afternoon, was well received and many fine exhibits were displayed.

The Hesketh Jubilee Athletic Association is holding a big sports day in that town on Wednesday, July 12th, commencing at 10 a.m. and ending in the morning. Men's, Ladies and children's sports and softball games, as well as other ball and track events, will be included in the program. A monster dance will be held at night.

Andy Shelton of Three Hills, Liberal candidate for Division Constituency, was in Carbon on Tuesday, conferring with local Liberals. Mr. Shelton was there in a strong Liberal feeling in this district at the present time.

Mr. and Mrs. Jas. Smith, Mr. and Mrs. C. Freiden, and Mr. and Mrs. J. J. Freiden, returned to Banff on Sunday and returned Monday.

R. J. Forrest is having a well drilled at the site of his new home, across from the tennis courts.

Richard Applegate left on Monday for Edmonton, where he will attend summer school classes at the University of Alberta.

John A. Strachan, who has been employed at The Chronicle office for the past five months, left on Tuesday for Calgary, where he hopes to secure work.

Mr. and Mrs. Aaron Klassen left on Monday for a two week's holiday with friends at Fort Saskatchewan, as well as other points.

Jas. Pichard of Calgary took in the tennis tournament at Carbon over the week end.

The Shorthorn Breeders' Association chartered one of the buses of the Bus Lines and members attended the field day and picnic held at Racombe yesterday.

E. Hill and Paul Barstead have moved into Mr. Hill's house.

Messrs. Perry and Tom Johnson and Mr. McCaig motored to Edmonton and Fort Saskatchewan over the week end and returned Monday night.

Grand Forks held their Sports yesterday afternoon.

Mr. and Mrs. Harley Davidson left on Monday for Edmonton, where they will attend summer school.

Farmers seem in a better mood these days. Fine weather and the old show of the photo of the source of the water has certainly made a difference on the countenance of some of our usual pessimistic agrarians.

Mr. and Mrs. Fred Fuller of Lacombe are visiting with relatives in the district.

## An Address To Young People

Mr. Greenan took Paul and Fergus Greenan, Wilfred Skerry and Malcolm MacGregor to Pine Lake on Sunday, where the boys will spend a couple of weeks' camping.

FOR SALE—Baby Du-Cart. Apply at Chronicle office for further particulars.

CHRIST CHURCH, CARBON

Services will be held as follows: 1st and 3rd Sundays in month, 11 a.m.; 2nd and 4th Sundays in month, 7:30 a.m.; 5th Sunday in month by arrangement. REV. S. EVANS, in charge

The following address was given by Rev. Wm. McNichol, M.A., at the Carbon United Church on Sunday morning, June 16th.

(Continued From Last Week)

We want every boy and girl in our church to have such a faith in God that it will act as an anchor to his or her soul, and entering within the veil and finding sure and steadfast to Jesus.

Now young people you are entering life for yourselves. No one's ever kind of sailors setting out on a long voyage without an anchor on board. No one would ever think of leaving himself for another to take an anchor for him. "I was as busy looking after the anchor for the voyage that I forgot about it," or "I was so busy beautifying the cabin," or "I had to look after the equipment I had no time to set my anchor." Nothing could be given that would prove a sufficient excuse for neglecting the anchor. You are soon to start on a long voyage. No matter who you are or what you are, you must set out. Are you going without an anchor? Do not for one moment imagine that you will never need one. Do not flatter yourselves that no contrary winds or cross currents will ever blast against your frail craft. I have been young and sure an odd lot. In all my experience I have never seen the young people who did not have to come with cross currents and contrary winds where the need for an anchor was great. You may have the best of parents, a splendid education, and brilliant talents, but these and others like them will not be sufficient to keep you when the storm breaks. You may have wealth, position and power, but they will all prove useless to you in the end if you have no anchor on board. If you would make a real and permanent success of your life, let me beg of you to take your anchor on board. Whatever you may have or fail to have, make sure of this. There is nothing, no one can think of that is of any importance in comparison with it. Do not let it pass your bluff you be saying you do not need it, or that it will be time enough to look for it when trouble comes. That is the greatest folly. For a young person to start life without being a Christian is far more foolish than for a man to start out on a sea voyage without an anchor.

Many many substitutes are later offered young people in place of an anchor. 1st. One person says that the difficulty to say to a sailor that he take something else for a substitute for his anchor? Men in religion, as

In everything else have sought out many inventions. Today we have all kinds of toys, and sets, all promising to have the only glad given reality. I pray you, do not accept any substitute for faith in Jesus Christ, until you have seen it change bad men into good; until it makes drunkards men live soberly, righteously and godly; until it sustains people in affliction, and cheers them in death.

Then do not be ashamed of your anchor. No sailor is ever ashamed of his. He does not hide it away in some dark corner. He knows that it will be handiest and ever ready for use. Does it not seem strange that Christian people should ever be ashamed of their faith or could be tempted to hide it away from view. Remember you cannot keep your anchor out of sight, and be ready to use it when the need arises. You may think today that you can do

without it. I have never known, a man who took that stand, who did not sooner or later come to a place where he needed it desperately, and then could not get it. We all need an anchor that will hold when the storm breaks. Your strength and virtue is not sufficient to hold secure

amid the storms of sin. Young people let me entreat you, not to set sail without the Christian hope. This is the first and the greatest necessity of life. All other things will fall far into their rightful place if you put Christ first, and ask the Holy Spirit to guide you all above life's highway.

## Midland &amp; Pacific Grain Corporation

Winnipeg, Calgary, Vancouver Grain Exchanges

A. C. RANDALL, President C. W. ROENISCH, General Manager

The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1930 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

## FAIR LABOR POLICIES BENEFIT THE CONSUMER

Worry and unhappiness are enemies of efficiency. We have always tried to be efficient and years ago we said, "to the greatest extent possible let us get worry and unhappiness out of this organization—out of the minds of every man and woman in our employ."

So Imperial Oil has always paid high wages. It set up sickness and death benefits, a pensions plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Company

policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.
